PROFESSIONAL SUMMARY

Versatile Web Developer with 2+ years of experience crafting responsive interfaces and 1 year of specialized Shopify Theme development. Proven ability to bridge the gap between custom code and e-commerce functionality to enhance site performance. Dedicated to delivering scalable, pixel-perfect solutions that drive user engagement and business growth.

WORK EXPERIENCE

MERN Stack Software Engineer | Axiolink Systems

July 2025 - April 2026

- Engineered Next.js API endpoints and backend logic for a multi-vendor delivery platform, implementing spatial data with PostgreSQL + PostGIS and H3 hexagonal indexing for location-based matching.
- Built Frontend Dashboards for Admins, Buyers, Sellers and Riders using React and Tailwind CSS.
- Integrated Mapbox for real-time location tracking and route optimization.
- Developed a modular e-commerce system using Node.js and Express, incorporating Stripe payment gateway integration and real-time order tracking with Mapbox.

Software Engineer Intern | Axiolink Systems

March 2025 - June 2025

- Engineered Next.js API endpoints and backend logic for a multi-vendor delivery platform, implementing spatial data with PostgreSQL + PostGIS and H3 hexagonal indexing for location-based matching.
- Built real-time rider tracking using Socket.IO and Redis GEOSEARCH, and integrated OSRM for route mapping and delivery-distance calculations.
- Implemented Cloudinary-based image management for product and vendor listings.
- Designed and implemented pixel-perfect dashboard UX flows for the Admin and Buyer consoles.

Freelance Shopify Theme Developer | Remote / Self-Employed

September 2025 – Present

- Engineered custom Shopify storefronts using Liquid and JavaScript, delivering pixel-perfect conversions from Figma designs.
- Optimized store speeds and resolved theme conflicts, ensuring a seamless user experience for diverse e-commerce clients.
- Managed end-to-end project lifecycles, from requirement gathering to final deployment and handover.

Freelance Game Developer (Unity) | Remote / Fiverr

October 2023 – May 2025

- Developed robust 2D and 3D game mechanics using C# and Unity Engine, translating client concepts into playable prototypes and final builds.
- Designed and scripted interactive user interfaces (menus, HUDs, and inventory systems) to enhance player navigation and engagement.

KEY PROJECTS

NeuroHaven (Early Stage Alzheimer's Care Platform)

Next.js | TypeScript | Tailwind CSS | Supabase

- Built the Doctor Dashboard for a team-built Alzheimer's caregiving and monitoring platform — the web bridge between the Flutter-based patient app and clinicians, integrating with a Python backend (Uvicorn + ngrok) for cross-service communication.
- Engineered real-time doctor-patient chat, calling, and a distress-alert system, plus a cognitive scoring engine (streak-adjusted 0–100 scale) with four color-coded risk tiers, weekly adherence grids, and live behavioral trend graphs.
- Built the Admin panel for platform moderation, including a support ticket system and one-to-many doctor-patient assignment logic with reassignment support.
- Added chat export to CSV/TXT for clinical record-keeping.

Learning Management System (LMS)

React.js | Node.js | Express | MongoDB

- Architected a multi-role educational platform featuring dedicated workflows for Administrators, Instructors, and Students.
- Implemented core LMS features including course enrollment, assignment progression tracking, and user management.

Typing Sprint Game

React.js | Node.js | Express | MongoDB

- Developed an interactive typing assessment application calculating live speed metrics (WPM) and accuracy percentages.
- Implemented a persistent MongoDB leaderboard with RESTful API endpoints for score submission and ranking updates.

EDUCATION

Bachelor of Computer Science (BS CS)

Expected Graduation: 2026

University of Management & Technology, Lahore, Pakistan

SKILLS

- Web Development:** JavaScript (ES6+), React.js, Redux Toolkit, Next.js, Node.js, Express.js, MongoDB, HTML5, CSS3, RESTful APIs, Tailwind CSS, OSRM.
- Shopify Development:** Liquid Template Language, JSON Templates (OS 2.0), Storefront API, Custom Section Building, App Integration, Performance Optimization.
- Software Engineering:** SDLC, Agile/Scrum, Requirements Engineering, SRS Documentation, UML Modeling, User Stories.
- Game Development:** Unity Engine (2D & 3D), C# Programming, Game Physics & Logic, UI Scripting, Asset Integration.
- Tools:** Git, GitHub, VS Code, Postman, Figma, Jira, Trello, Netlify/Vercel.
